Analysis

CUSTOMER NAME: MICOR CORP.

800 Clarmont Ave Bonsalem, PA. 14020

Your sample file strips have been tested for archival quality (residual thiosulfate concentration). Likey were tested according to the methylene blue method described by the American National Standards Institute.

Concentrations of less than (O 1.4 mg (micrograms) indicate archival quality, and greater then (O) 1.4 mg indicate non-archival quality. The test is only meaningful and accurate if performed no later than two weeks after processing. It is our understanding that we have received your file within the 2 week time-frame.

Actual test readings are provided below, as well as "pass/fail" check marks.
